

DIRECTIONS FOR PACKING CYLINDER RECORDS FOR SHIPMENT

1. Secure each record box lid to the box with either a couple of rubber bands or saran wrap.
2. Pack the records with Styrofoam peanuts or bubble wrap so that each box is cushioned from the others with no contact.
3. Make sure there's a couple of inches of peanuts/bubble wrap between the record boxes and the shipping box.
4. If at all possible, double-box the shipment.

THANK YOU!
